Abstract (en)

A cylinder-piston unit (1) comprising a cylinder (2) containing in its interior a piston rod (3), at least one end of which emerges from said cylinder (2), said piston rod (3) being rigid with a piston (4) sealedly slidable within said cylinder (2), there being associated with said cylinder-piston unit (1) a device for measuring the axial position assumed by said piston (4) within said cylinder (2); said measuring device comprises M ($M \geq 1$) movable sensor elements (9) rigid with said piston (4) and N ($N \geq 1$) fixed sensor elements (100) positioned external to said cylinder (2). <IMAGE>
