Abstract (en)
[origin: EP1201991A1] The burner plate (15) seals off the mixer body and has mixture-outlets. The mixer body (12) and burner plate have creases on a wall section. At least two opposite-facing creases (38,38') are formed on the wall sections (29,37) of the mixer body and burner plate, and provide a seal between two components. The height of the top creases pointing towards the mixture outlets is lower than that of the lower creases further from the mixture outlets.
