Abstract (en)  
[origin: EP1202298A2] The cable has two individual twisted cables (1,2) consisting of individually lacquer-insulated sub-conductors (3) enclosed by a common sleeve (5). The individual twisted cables are arranged inside the common sleeve without their own insulating coatings and are held apart by distance pieces (6) of insulating material. Independent claims are also included for the following: a method of manufacturing a multiple twisted cable.
