Abstract (en)

[origin: EP1202306A2] The device has a rocker switch/rocker button base (2) with a first electrical contact rocker (4), a pivoting device (3) for a switch movement acting on the contact rocker mounted in the base and a hand control for controlling the pivoting device. An actuator (6,7) can be mounted in the electrical switch/button device with which a rotary motion of the hand control can be converted into a switching movement acting on the contact rocker.
