Abstract (en)
[origin: WO0107978A2] A homepage building method including the steps of: executing a wizard function composed of a site manager step of determining a desired homepage structure of a user, a style manager step of selecting the page pre-built and stored by a professional designer for each page constituting the homepage according to a desired style of the user and a layout manager step of determining a banner word and a menu position of each page where the style has been determined; and executing an editor function of editing each page determined by the wizard function with characters, images, site links and the like. The homepage building method is capable of moving the components thereof in a free manner, thereby achieving the homepage building and the change of the homepage pre-built in an easy manner. In addition, with the homepage building method according to the present invention, in case where the homepage building method is provided on the on-line by a server, only by storing the homepage built according to the present invention in the server, the corresponding homepage is uploaded on the Web site by the server, without taking a separate step of uploading the homepage built on the Web site.
