Abstract (en)
[origin: DE19937511A1] The invention concerns a method for adjusting parabolic antennae comprising a reflecting device in the form of a parabola or part of a parabola and attached to a fixing arm, and a receiver device arranged substantially in the focus of the reflecting device. Said method is characterised in that it comprises the following steps: first, adjusting the fixing arm using a measuring device provided therein, without fixing the reflecting device on said fixing arm; then fixing the reflecting device removable on said fixing arm.
