Abstract (en)
Blood conditioning device (10) for removing bubbles and particles from a stream containing a mixed flow having both particles and bubbles, said device comprising: a first dynamic separation section (41) for separating bubbles from said mixed flow, generating a flow of particles and blood but free of bubbles; a second section (40) coupled to said first section having a filter membrane arranged to intercept the flow of particles and blood generating a flow of blood free of both particles and bubbles. <IMAGE>
