Abstract (en)  
[origin: EP1203601A2] The club consists of a handle (11) and a head, made from aluminium alloy or a synthetic material, inscribed within a pentahedron and having straight (5, 5', 7, 7', 9, 10) and curved (6, 8, 8') edges and at least one flat face (4) making contact with the ground. The head has a plane of symmetry (S - S) perpendicular to the flat face and containing the handle and two symmetrical faces (1, 1') allowing a right- or left-handed player to make first and second strokes, which loft the ball to different heights, by turning the head through 180 degrees, and a third (putting) stroke using a face (2) perpendicular to the plane of symmetry.
