Abstract (en)

[origin: EP1203664A2] The circuit is arranged such that the protection (6) is in signal communication with the control (2) of the printing machine (1). The protection (6) is actuated on the signals by the control (2) during the downward operation of the command computer (3). The command computer (3) at the side of the control (2), is supplied with condition signals pertaining to the downward command.
