Abstract (en)

[origin: EP1203722A2] The box (1) has a pouring spout (8) formed from one cutaway corner between top (4) and end (3) walls, and foldable between closed and open positions. The top wall has a downward-sloping portion with side folds (11), and the spout is formed from the end wall (3) by means of a second pair of folds (14), sloping inwards from a lower fold (12) and fastened by adhesive to the downward-sloping portion of the top wall by a security tab (16) with perforations that allow the tip of the spout to be detached for opening.
