Abstract (en)
[origin: WO0025648A1] This invention relates to a receptacle that may be mounted exteriorly on a toilet bowl which young male children may urinate in. The receptacle includes a bowl like receiving portion (22) that is adapted to receive and hold fluids deposited therein and a clip (10) for attaching the receiving portion (22) to the lip of a toilet bowl. The receiving portion (22) is pivotally connected to the clip (10) and wherein the receiving portion (22) is capable of movement relative to said clip (10) between a first position wherein said receiving portion (22) is exteriorly accessible to a user and a second position whereby said receiving portion (22) is contained within the toilet bowl.
