Abstract (en)
[origin: WO0112522A1] An article carrier and blank for forming an article carrier for accommodating a plurality of articles (A), for example, bottles having a trapezoidal cross section. The carrier comprises a top (22), a base (18) and opposed sides (20, 24) interconnecting the top (22) and the base (18) wherein one or more of the side walls (20, 24) are placed in an acute angular relationship with respect to said base (18). The carrier is collapsible along a supplemental hinged connection (66) formed in the base (18) thereby to enable the carrier to move between flat collapsed and set up conditions.
