Abstract (en)

[origin: WO0066469A1] The invention relates to a method in continuous reeling up of a paper web. According to the method the paper web is guided by means of guiding means (1) to a reeling up stage, wherein when the preceding paper reel has become full, the end of the paper web is cut (5), the end of the paper web is guided on a new reeling core (6, 7), and a paper reel is formed on the new reeling core (6, 7). The method is characterized in that the end (KP) of the paper web cut at the change situation of the reeling core (6, 7) is guided past the full paper reel (R1) in the machine direction. The invention also relates to a reel-up applying the method.
