Abstract (en)

[origin: WO0114564A2] Disclosed are four novel human nucleic acid sequences expressed in activated T-lymphocytes. Also provided are polypeptides encoded by these nucleic acid sequences, and antibodies that immunospecifically bind to a polypeptide of the invention, or any derivative, variant, mutant or fragment of the polypeptide, polynucleotide or antibody. The invention further provides therapeutic, diagnostic and research methods for treating and diagnosing disorders related to these novel human T-lymphocyte proteins.
