Abstract (en)
[origin: EP0947151A2] The shelving structure has suitable feet (2) to support vertical columns (1) to hold the suspended arms (3) which carry the shelves (4). The structure has stabilizers (5,6) to give the shelving rigidity along its length (L). The arms (3) are profiled from a number of bent wall sections, and have plug fittings to hold the stabilizers (5,6). Locks block inadvertent vertical movements of the arms (3).
