Abstract (en)
The hanger of the invention includes a hook-shaped element (1), and it is characterised in that it includes means for attaching (2) it to a substantially horizontal surface (3). Said hook-shaped element (1) can rotate around said means of attachment (2), and preferably said means of attachment are formed by a clamp (2). It permits that personal effects can be hung from the hanger of this invention without them being accessible to persons unconnected with the table to which the hanger is attached, and said hook can be placed in any position desired. <IMAGE>
