Abstract (en)  
[origin: EP1205393A2] The lid includes a ring (1) attached to a can and formed with a lid opening (5) surrounded with a flange (4). The flange has upper web portion folded outward over a lower web portion, in which both web portions are flatted together. A detachable lid membrane (2), having peripheral edge (6) in contact with the abutting edge (3) of the flange upper web portion, seals the lid opening. An Independent claim is also included for the can sealing method.
