Abstract (en)

[origin: EP1205611A2] The rigid removal strip (12) preferably integrally formed from the profile (1) protrudes from the seal plane (2a) of the sealing arm part (2) of the profile in the direction of the construction element. The profile is especially suitable for thermal insulation facades adjoining window or door posts, and is provided with a sealing arm adjacent to the construction element, as well as a rigid removal strip in the sealing arm region, the strip having at least one removal edge (17, 18) for the plaster.
