Abstract (en)

[origin: EP1205612A2] The end profile (1) for a building insulation plate has a leg (2) for fixture to a wall and a normally formed support leg (3) for accommodation of an insulation plate. The end profile as at least one reinforcement component (5) formed with it. The reinforcement component is arranged normally to a longitudinal axis (1') of the end profile formed by the intersection line of the fixture leg with the support leg.
