Abstract (en)

[origin: EP1205627A2] Concerns a door for a piece of furniture, with a substantially parallelepiped form, with two dimensions (H, L) substantially larger than its thickness (S). The coating, made of steel, is foreseen on all six sides of the door. It is characterised in that the handle which allows its opening and closing is realised through two extensions (2', 3') from the covering layers of the two opposite faces (2, 3) having a larger surface area. <IMAGE>
