Abstract (en)  
An electrical conductor support insulator for passing through and supporting a main circuit conductor 2 within a hole 1a of the conductor support insulator 1. Neither bushing nor securing member such as bolts is needed in the conductor support insulator 1. When the main circuit conductor 2 is an electrical insulating material, all portions except for the conductor connection portion is insulated, so that no bare live portion is present and space insulation distance is made short. <IMAGE>
