Abstract (en)
[origin: DE19940586A1] The invention relates to a printer with two printing stations. Two printing head receptacles (22) with holding means (26, 30) for detachably fixing one printing head (24, 48) respectively are mounted on a carriage (16) which is guided so that said carriage can be displaced parallel in relation to a printer abutment (36). The respective printing head receptacle (22) is designed for a first kind of printing head (24) and can be connected to a printing head adapter which is configured for receiving a printing head (48) of another kind.
