Abstract (en)
[origin: WO0064758A2] A carton for accommodating a plurality of articles, for example bottles. The carton comprises a top, a base, opposed side panels and end panels wherein an access structure is provided by one of the carton panels to provide temporary access to the interior of the carton during and/or after the erection of the carton by creating an opening in the panel, the access structure comprising a hinged flap which can be hinged from a closed position to an open position to create the opening, a flap limiter being provided to restrict hinging of the flap to prevent it from opening beyond a predetermined position.
[origin: WO0064758A2] A carton (10) for accommodating a plurality of articles, for example bottles. The carton comprises a top (36), a base (12), opposed side panels (14, 16) and end panels (38, 40) wherein an access structure is provided by one of the carton panels to provide temporary access to the interior of the carton during and/or after the erection of the carton by creating an opening in the panel, the access structure comprising a hinged flap (17) which can be hinged from a closed position to an open position to create the opening, a flap limiter being provided to restrict hinging of the flap to prevent it from opening beyond a predetermined position.
