Abstract (en)
[origin: DE19940138A1] The invention relates to a method for producing (cigarette) packets from blanks which are drawn off from a continuous material web which is rolled in the form of a bobbin. Glue regions (34-39, 48-51) for connecting foldable tabs are arranged on both sides of the material web and are positioned in different lines of the material web in such a way that glue regions of the one side of the material web do not overlap with glue regions of the remaining side when the web is in the rolled state thereof.
