Abstract (en)
[origin: WO0116273A1] Bleach boosting compounds selected from the group consisting of bleach boosters comprising quaternary imine cations, zwitterions, polyions having a net charge of from about +3 to about -3 and mixtures thereof, bleaching species comprising oxaziridinium cations, zwitterions, polyions having a net charge of from about +3 to about -3 and mixtures thereof, and mixtures thereof are disclosed. The bleach boosting compounds increase bleaching effectiveness even in lower temperature solutions and provide improved stability toward unwanted bleach boosting compound decomposition. The bleach boosting compounds are ideally suited for inclusion into bleaching compositions including those with deterative surfactants and enzymes. Also provided is a method for laundering a fabric employing the bleach boosting compounds, and a laundry additive product employing the bleach boosting compounds.
