Abstract (en)

[origin: EP1207027A2] The intermediate material insertion device lays intermediate filling material between a slice (20, 21) cut from the loaf and the remaining loaf (2, 23), or places the filling material between the loaf and a slice. The device (6) has one or more air jets (10). The jets are arranged to provide an air flow (1) to lay the filling material against the slice or loaf.
