Abstract (en)

The end of course detector for a flexible swimming pool cover has inductive proximity sensors placed on the flexible straps (L) of the movable supports. The detection of the end of course is sensed by metal sensors (D) placed on the straps. The straps can be held in contact with the cover by a counterweight.

Abstract (fr)

Le système de détection des fins de course est effectué par des détecteurs de proximité inductifs placés sur des lanières souples L ou sur des supports mobiles . <IMAGE>
