Abstract (en)
[origin: EP1207357A2] The central heating system (10) has a series of pipelines and several heating lines (32) connected parallel to each other to the pipeline network through inlet and outlet pipes. Each heating line (32) has its own dedicated through-flow limiter (26) fitted into the supply or outlet pipe (24, 30). The pipeline network can consist of several pipeline sections arranged at different levels of a building.
