Abstract (en)

[origin: WO0112016A1] The invention concerns outdoor seats, chairs, armchairs (1) or benches with a back portion (2) serving as protective cover when it is set in a substantially horizontal position. In said configuration, water trickling from the outer surface of the back portion (2) and from its edges is stopped by a profile (4) preventing the drops from trickling inwards. The inventive chairs are particularly designed for outdoor use where they are subjected to bad weather conditions.
