Abstract (en)

[origin: WO0115697A1] The invention refers to a use of at least one substance based on nicotine and/or a substance produced from said one substance for the manufacture of a medicament to be supplied to an individual of a human being or an animal for the purpose of counteracting, in a prophylactic or therapeutic manner, obstructive lung diseases, in particular pulmonary emphysema. The medicament is intended to be supplied via the blood path and to be administered via the gastrointestinal tract, transdermally, intravascularly, intranasally or intravaginally. The invention also refers to a method for prophylactic or therapeutic treatment of obstructive lung diseases of an individual of a human being or an animal, wherein said individual is supplied with a nicotine-based substance.
