Abstract (en)

[origin: WO0103927A1] The invention relates to a blocking layer (6) that seals and superficially impregnates a base layer (7) and that is produced by thermo-bonding. The exterior of said base layer (7) is provided with a blocking layer (6) that consists of a deformable elastic material and is thereby sealed. The inventive vehicle trim element (1) consists of a structural support element (2) and a multi-layer decorative structure (3) that is produced according to the invention.
