Abstract (en)

[origin: WO0115995A1] The invention concerns a method for fixing in a can comprising a container (3) closed with a lid (14), a device for automatically extracting a straw (2) comprising a straw-supporting member consisting of an elastically deformable retaining arm (8) designed to be tensioned by elastic deformation, said arm comprising a retaining tube (10) for the straw. The invention is characterised in that it consists in tensioning the arm (8) by direct or indirect action of the lid when said lid (14) is being coupled with said device.
