Abstract (en)

[origin: WO0111158A1] The invention relates to a method for dehumidifying and for reducing destructive salts of brickwork, whereby preferably one horizontal sealing (2) is inserted in this brickwork (1). One or more pocket hole(s) (3) is/are inserted in the brickwork (1), preferably in the section of the brickwork (1) located above the horizontal sealing (2), and all pocket holes (3) are subjected to the action of negative pressure.
