Abstract (en)

[origin: WO0108108A2] A document handling system is configured for detecting counterfeit bills using infrared light. The document handling system comprises an infrared light source, a sensor that is adapted to produce an output signal in response to infrared light illumination of a document, and a processor that is programmed to receive the signal and to authenticate the document based thereon.

[origin: WO0108108A2] A document handling system (10) is configured for detecting counterfeit bills using infrared light. The document handling system comprises an infrared light source, a sensor that is adapted to produce an output signal (34) in response to infrared light illumination of a document, and a processor (54) that is programmed to receive the signal and to authenticate the document based thereon.
