Abstract (en)
[origin: EP1208774A2] A furniture unit for the presentation of wares, especially a cold counter (1), has at least one evaporator (4) and/or heat exchanger in which a cooled air stream is generated. At least one additional separate closed coolant (mixture) circuit (7) is provided that allows a contact cooling of the wares' display floor (6) and/or the wares' chamber. This has at least one heat exchanger (5). The heat exchanger(s) is/are located so that the cooled air stream generated in the evaporator(s) and/or heat exchanger(s) is led at least partially through the heat exchanger(s). The additional separate closed coolant(mixture) circuit(s) are designed to be removable from the furniture unit.
