Abstract (en)

[origin: EP1208950A1] Tool has a holder (22) with an attachment opening or connection to a drive shaft (14), which can preferably be driven in an oscillating manner, and a recess for attachment of a working part (24). The working part comprises at least two separate support sections and a fastening plate (34) to which a safety element, which cooperates with the support sections, is detachably attached. The safety element serves to tension the working part against the holder.
