Abstract (en)
Disclosed is a filing material comprising a sheet 1 having a folding line 21 at a center portion for filing leaves 4 each having at least one hole at an edge portion. Slippery and flexible strap members 31,32 are implanted on the sheet symmetrically at both sides of the folding line 21 in alignment with holes 41 of each leaf 4. The two strap members 31,32 are inserted into the holes 41 of the leaves 4 in a crossing relationship within the holes 41 for holding the leaves 4. The filed leaves 4 can be open at any desired page for making photo copy, removing, replacing or adding. It is easy in handling and less expensive to make. <IMAGE>
