Abstract (en)

A color picture tube having a panel (1) whose outer surface is approximately flat and a shadow mask (5) having a curvature, wherein to increase the curvature of the shadow mask, two electromagnetic quadrupole lenses (14, 15) which change the effective dimension s to determine the curvature of the shadow mask are provided. Both of these two electromagnetic quadrupole lenses are arranged at the cathode side of an electron gun (9) rather than at a horizontal deflection coil of a deflection yoke (10). <IMAGE>
