Abstract (en)

[origin: WO0117509A1] The invention relates to an agent for improving and maintaining bowel function and/or for improving and/or normalizing defecation. Said agent contains a material which decomposes in the stomach and/or the short intestinal tract and is provided with a compound which dissolves first in the intestine and contains prophylactic or laxative active ingredients which are first predominantly or exclusively released in the intestine. The invention also relates to a method for the production of the agent and its utilization.
