Abstract (en)

[origin: WO0119578A1] The invention relates to a saw blade having a base body (1). Segments (3) consisting of abrasive material are welded to the base body (1). The segments (3) are configured in the form of platelets (31) which at least partially embrace the base body (1). The invention also relates to a method for producing saw blades with segments (3) consisting of abrasive materials. Said segments are arranged on saw blades. The saw blade is put under tension and the segments (3) are pushed onto the saw band by means of a feeder (34). The feeder (34) is under tension.
