Abstract (en)
[origin: WO0118182A1] Transcription promoter and terminator sequences from the *Pichia methanolica* glyceraldehyde-3-phosphate dehydrogenase 2 gene (*GAP2* gene) are disclosed. The sequences are useful within DNA constructs for the production of proteins of interest in cultures *P. methanolica* cells. Within the expression vectors, a *GAP2* promoter and/or a *GAP2* terminator is operably linked to a DNA segment encoding the protein of interest.
