Abstract (en)
[origin: WO0118322A1] The invention relates to a placing device for placing holding plates for fixing roofing on flat roofs. Said placing device comprises the following: a magazine (2) for a stack of holding plates (1), a support (3a, 3b) for the stack of holding plates, said support being movable in relation to the magazine, a clamping device (4) which is located to the side of the stack and which clamps or releases at least one holding plate, a fall shaft (26) for transferring an individual holding plate into a placement position parallel to the roof, said holding plate dropping from the support; and a fixing device (8) for fixing the holding plate, now located in the placement position, on the roofing. The movements of the support and clamping device are controlled by at least one cam gear.
