Abstract (en)
[origin: WO0033234A1] A system and method for facilitating aggregate shopping is provided. The system (10) maintains a database server (12) for storing at least one shoppers group being characterized by a designated product and conditions for purchasing the designated product and a plurality of client computers (14) which communicate with database server (12) for joining a shopper groups. Suppliers (18) provide members of the shopping groups selected products to be purchased by communicating with database server (12).
