Abstract (en)

[origin: DE10057643A1] A conventional printing machine, consisting of at least two printing turrets (31-34) with at least one following arrangement doping unit for applying a final finishing layer. The printing turrets are provided for the squeezing of at least two ink systems, deviating from each other, concerning their absorption ability for the final doping layer. One of these ink systems is provided for the printing of significant prominent making printed image components. Optional driers (111) are assigned to the printing mechanisms (31-34) and for the application of the final doping layer, a doping unit (4) is arranged following the printing mechanism.
