Abstract (en)
[origin: EP1211207A2] A paper-like material processing method includes the steps of conveying paper-like materials, discriminating in discriminator (9) the direction of the front/back and top/bottom of paper-like materials being conveyed, a step of changing the directions of paper-like materials to prescribed directions by switching conveying paths of paper-like materials with gate (13) according to the result of discrimination, a step of stacking paper-like materials of which directions are changed, and changing the directions of succeeding paper-like materials to be stacked to the reverse direction of paper-like materials already stacked by changing the conveying path whenever paper-like materials in the prescribed number of sheets are stacked. <IMAGE>
