Abstract (en)

[origin: EP1174573A1] The fitting comprises a bolt holder (4) having a slot (5) which receives the tail (6) of the bolt (7) carrying a catch. A complementary part (30) to the locking screw (16) engages the bolt tail to prevent the bolt sliding in the bolt holder slot. This complementary part is accessible from outside the fitting casing from the same side as the locking screw.
