Abstract (en)

The radiator for drying and/or warming towels and household linens, as well as for heating domestic rooms, comprises a wall-mountable frame (T) consisting of a pair of vertical members (11,12) connected to each other by at least a horizontal member (13). The frame (T) is provided with at least a towel and/or household linen supporting member (14,15,16) formed of a plurality of horizontal tubular elements (17) connected at each end thereof to a pair of supporting arm members (18) which are rotatably linked to the vertical members (11,12) of the frame (T) so as to permit them to be rotated from a first substantially vertical position to a second substantially horizontal position and viceversa both of which are adapted for drying and/or warming towels and/or household linens. <IMAGE>
