Abstract (en)
[origin: EP1211703A1] A remote control unit for electronic apparatus comprises: at least a first plurality of keys (3) for controlling main functions for said apparatus, each labelled with a function symbol (4) ; a second plurality of keys (5) for controlling auxiliary or accessory functions for the apparatus; a microprocessor unit (6) operating on the first and second pluralities of keys (3, 5) and having a plurality of memory banks (7) for the corresponding settings of at least the auxiliary or accessory controls, referring to different makes and models electronic apparatus; means (8) for selection of the settings which act upon the microprocessor unit (6) ; at least part of the second plurality of auxiliary keys (5) is grouped on a circumscribed portion (9) of a surface (1) of the unit (100). The unit (100) further comprises a plurality of covers (11) with function symbols (12) referring to each key (5), and which may be attached, individually and in such a way that they can be removed, using means (10), to the circumscribed portion (9) when the apparatus to be controlled by the microprocessor unit (6) is selected using the selection means (8). <IMAGE>
