Abstract (en)
[origin: WO0119218A1] A rocking chair (1) comprises a non-rocking base (4) and a seat (2) having two arms (5) and a generally horizontal supporting surface (2a). The seat (2) is rockably mounted on the non-rocking base (4) via contacting rocking surfaces (3<1>, 7). The level of the rocking surfaces (3<1>, 7) is closer to the supporting surface (2a) than to floor level. The rocking surfaces (3<1>, 7) are located within the arms (5) of the seat (2) to restrict access thereto and thus reduce the risk of finger pinching.
