Abstract (en)
[origin: WO0119526A1] A conventional airless tip (18) is located in line in the fluid line (20) immediately down stream of the static mixer (16) in a plural components metering and mixing system (12). A pressure drop of 10-30 bar across the spray tip (18) provides enhanced mixing for aqueous and other hard-to-mix plural component materials.
